

**SITMAAI**

**Sitmaai**

Automation • AI Agents • Intelligent Operations

Jeddah – Saudi Arabia

# Company Overview

Sitmaai is a company specialized in automation and AI systems designed to operate within organizations.

We design and deploy **Private AI Agents** that work inside the company environment and integrate with existing systems to help operational teams complete daily tasks faster and with greater accuracy.

The goal of Sitmaai is to enable organizations to operate using intelligent systems that support employees and improve operational efficiency.

# What Sitmaai Does

Sitmaai focuses on three core areas:

This includes:

- Communication automation
- Data entry automation
- Follow-up automation
- Operational workflow automation

The objective is to reduce wasted time and increase operational efficiency.

## Automation

Automation of operational processes that are typically performed manually within organizations.

# AI Agents

Sitmaai designs and builds AI Agents that function as digital assistants within business operations.

## Understand Requests

Interpret and process employee and operational requests intelligently.

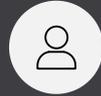

## Analyze Information

Process and evaluate data to surface meaningful insights.

## Execute Tasks

Carry out operational tasks autonomously and accurately.

## Assist Employees

Support employees in their daily work as a reliable digital partner.

Each AI Agent is trained on the company's internal knowledge and operational processes.

# Intelligent Operational Systems

Sitmaai develops systems that help organizations manage operations more efficiently and intelligently.

1

## Operational Management Systems

Streamline and oversee day-to-day organizational operations.

2

## Customer Interaction Systems

Manage and enhance every touchpoint with customers intelligently.

3

## Operational Reporting Systems

Generate accurate, timely reports to keep teams informed.

4

## Decision-Support Analytics Systems

Provide data-driven insights to guide strategic decisions.

These tools help management and operational teams make better decisions using real-time data.

# AI Tools for Employees

Sitmaai provides AI tools that help employees perform their daily tasks more efficiently and with fewer errors.

## Quick Knowledge Search

Instantly surface the right information from internal knowledge bases.

## Email & Report Writing

Draft professional communications and reports with AI assistance.

## Data Analysis

Analyze complex datasets quickly and accurately.

## Repetitive Task Execution

Automate recurring tasks to free up employee time and ensure operational accuracy.

**AI becomes a practical assistant for every employee inside the organization.**

# System Integration

Sitmaai solutions integrate with existing enterprise systems such as:

CRM Systems

Internal Operational Systems

Email Platforms

Communication Tools

Databases

This integration adds an intelligent layer without replacing existing infrastructure.

# Security & Data Control

Sitmaai solutions are designed for enterprise-level security and governance.

## Data Isolation Per Client

Each client's data is fully isolated, ensuring no cross-contamination between organizations.

## Deployment Within the Client Environment

Solutions are deployed directly inside the client's own infrastructure for maximum control.

## Data Encryption

All data is encrypted at rest and in transit to protect sensitive information.

## Full Policy & Information Control

Organizations retain complete governance over their data and operational policies.

This ensures strong data protection and regulatory compliance.

# Business Impact

Organizations using Sitmaai solutions can achieve:

## Faster Operational Processes

Accelerate workflows and reduce time-to-completion across all operations.

## Reduced Human Errors

Minimize mistakes through intelligent automation and AI-assisted execution.

## Higher Employee Productivity

Empower employees to focus on high-value work by offloading repetitive tasks.

## Lower Operational Costs

Reduce overhead and inefficiencies through streamlined intelligent operations.

## Improved Customer Experience

Deliver faster, more accurate service to customers through intelligent systems.

# Sitmaai Vision

Sitmaai aims to enable organizations to operate through integrated AI systems that work alongside employees and become part of the company's operational infrastructure.
